WEEK 1: REVISION OF HTML TABLES & CSS BASICS

Revision of HTML Tables

HTML tables are used to **arrange data in rows and columns**.

Basic table structure:

```
<table>
 <tr>
  <th>Name</th>
  <th>Age</th>
 </tr>
 <tr>
  <td>Ada</td>
  <td>13</td>
 </tr>
</table>
```

Revision of Inline CSS

Inline CSS is written **inside an HTML tag** using the style attribute.

```
<p style="color: blue;">Hello World</p>
```

Difference Between HTML and CSS

- **HTML** → Structure (what appears)
- **CSS** → Style (how it looks)

Class Activity

- Create a simple table
- Add inline CSS to change text color and border

WEEK 2: TYPES OF CSS

1. Inline CSS

Written inside HTML tags.

```
<h1 style="color: red;">Welcome</h1>
```

2. Internal CSS

Written inside <style> tag in the <head> section.

```
<style>
 p {
  color: green;
 }
</style>
```

3. External CSS

Written in a separate .css file.

HTML file

```
<link rel="stylesheet" href="style.css">
```

CSS file (style.css)

```
p {
 color: blue;
}
```

Advantages of External CSS

- Easy to manage

- Reusable
- Keeps code neat

WEEK 3: CSS SYNTAX & SELECTORS

CSS Syntax

```
selector {
  property: value;
}
```

Example:

```
h1 {
  color: purple;
}
```

Types of Selectors

Element Selector

```
p {
  color: black;
}
```

Group Selector

```
h1, h2, p {
  font-family: Arial;
}
```

Class Selector

```
.note {
```

color: red;

}

HTML:

** Important **

Class Activity

- **Create a class**
- **Apply it to two elements**

WEEK 4: CSS TEXT PROPERTIES

Text Properties

- **color**
- **font-size**
- **font-family**
- **text-align**
- **text-decoration**

Example:

p {

color: blue;

font-size: 18px;

text-align: center;

}

Class Activity

Style:

- **Headings**

- **Paragraphs**

WEEK 5: CSS BOX MODEL

Box Model Parts

1. **Content**
2. **Padding**
3. **Border**
4. **Margin**

Example:

```
div {
 padding: 10px;
 border: 2px solid black;
 margin: 15px;
}
```

Explanation

- **Padding → space inside**
- **Margin → space outside**
- **Border → edge**

Class Activity

Create a box and adjust spacing

WEEK 6: STYLING TABLES WITH CSS

Table Styling Properties

```
table {
```

```
 border-collapse: collapse;
 width: 100%;
}

th, td {
 border: 1px solid black;
 padding: 10px;
}
```

Hover Effect

```
tr:hover {
 background-color: lightgray;
}
```

Class Activity

Style a price list or student record table

WEEK 7: INTRODUCTION TO HTML FORMS

What is a Form?

Forms are used to collect user information.

Basic Form Structure

```
<form>
 <label>Name:</label>
 <input type="text"><br><br>
```

<label>Password:</label>

**<input type="password">

**

</form>

Class Activity

Create a simple login form

WEEK 8: FORM INPUT TYPES & ATTRIBUTES

Input Types

<input type="email">

<input type="number">

<input type="radio">

<input type="checkbox">

Form Attributes

- **placeholder**
- **required**
- **maxlength**

Example:

<input type="text" placeholder="Enter name" required maxlength="20">

Select & Option

<select>

<option>JSS 1</option>

<option>JSS 2</option>

</select>

WEEK 9: STYLING FORMS WITH CSS

Styling Inputs

```
input {
  padding: 8px;
  width: 200px;
}
```

Styling Buttons

```
button {
  background-color: blue;
  color: white;
}
```

Class Activity

Style a registration form

WEEK 10: PAGE LAYOUT USING DIVS

What is ?

A is a container used to group content.

Simple Page Layout

```
<div class="header">Header</div>
<div class="content">Content</div>
<div class="footer">Footer</div>
```

CSS

```
.header, .footer {
  background-color: gray;
}
```

Class Activity

Create a simple webpage layout

WEEK 11: INTRODUCTION TO SEMANTIC HTML

Semantic Elements

Semantic tags describe their meaning.

Tag	Use
<header>	Top section
<nav>	Navigation
<section>	Page section
<footer>	Bottom

Example

```
<header>
  <h1>My School</h1>
</header>

<nav>
  <a href="#">Home</a>
</nav>
```

WEEK 12: MINI PROJECT (GUIDED)

Project Title: School Website

Pages Required

- Home
- Student Registration Form
- Timetable Table
- Contact Page

Rules

- Use external CSS
- Use forms and tables
- Proper layout
